PROJECTS

Stacks Of Wax Web App

I developed Stacks of Wax, a web application that allows users to browse and collect music albums. The site features a user-friendly interface, allowing anonymous users to browse albums and registered members to create their own collections. Collections can be shared with the community and can be set to public or private. For registered members, their collections are stored securely with encryption to ensure privacy. The website also features a dynamic search and filtering system, allowing users to easily find the albums they're looking for. I used HTML, CSS, JavaScript, and the Express Node framework, along with external libraries, to create a successful web application that showcases my skills in web development and ability to learn and utilize new technologies effectively.

Climate Catastrophe Game

As part of a group of four, I developed a console-based text game called Climate Catastrophe using Java. The game follows a monopoly-style board game format and is based on the theme of climate change. The objective of the game is to save the planet from the disastrous effects of climate change by making strategic decisions and taking action to reduce carbon emissions. This project showcased my ability to work in a team and develop a Java application for a real-world problem.

WORK EXPERIENCE

Freelance Draftsman @ Seaside Engineers

JUL 2020 - AUG 2022 | USA (Remote)

- Created drawings for screen enclosures, permit drawings for residential projects, and custom drawings at the request of the Engineer.
- Improved efficiency and accuracy through a custom-built plugin for AutoCAD.
- Showcased problem-solving ability and resourcefulness in finding ways to improve the drawing process.

This experience highlights my technical skills in using AutoCAD and Auto LISP, my ability to work independently and effectively, and my ability to continuously improve my workflow.

Intern Architect @ RC Architecture

FEB 2021 - JUL 2021 | Bangalore, India

- Assisted in creating drawings for various teams, conducting research, and completing tasks for multiple departments.
- Gained hands-on experience in the field of architecture, developing skills in attention to detail, research, time management, and collaboration.
- Attended meetings and gained valuable insight into the day-to-day operations of an architecture firm.
- Showcased strong work ethic and eagerness to learn and contribute to the team.

This experience as an Intern Architect highlights my hands on experience in the field of architecture, my developing skills, and my strong work ethic and eagerness to learn and contribute to the team.

EDUCATION

Queen's University Belfast MSc. Software Development

Sep. 2022 - Sep. 2023

- Programming
- Database
- Computing Foundations
- Software Engineering
- Web Development
- Individual Software Development Project

Dayananda Sagar College of Architecture, India

BArch. Architecture

Aug. 2016 - Aug. 2021

Nutana PU Science College, India

A-Level College

Jul. 2014 - Jul. 2016

Bapuji Higher Primary CBSE English Medium School, India

School | Junior High School |
Senior High School

Aug. 2004 - Aug. 2014

SKILLS & INTERESTS

Programming Languages: Java; HTML; CSS; JavaScript; MySQL; Python; Auto LISP.

Applications: Eclipse; IntelliJ; VS Code; Microsoft Office; AutoCAD; Adobe Creative Cloud.

Courses: Learn Python (Free Code Camp); Auto LISP (YouTube).

Interests: Gaming; Archery; Travelling; 3D Modelling; Gym; Binge watching random YouTube videos; Reddit; Cooking.
