ABOUT ME

Upcoming Software developer graduate from a Russell Group university with fundamental knowledge of software design, development, and testing. Tech enthusiast with a strong desire to succeed in the IT industry. I've worked with complex software from the user's perspective and created plug-in to automate parts of the software.

RC Architecture, India

JUL - 2021

- Assist in creating drawings for various teams
- Conduct research at the request of the supervisor
- Complete tasks assigned by managers from various departments.
- Attend meetings

FREELANCE DRAFTSMAN

JUL - 2020

Seaside Engineers, USA

AUG - 2022

- Create drawings for screen enclosure.
- Create permit drawings for residential projects
- Create custom drawings at the request of the Engineer

PROJECTS

AUTOCAD PLUGIN

Personal

- **Situation:** Repetitive diagram with varying values is being produced.
- **Task:** Reduce the time it takes to create the diagram by automating the process.
- **Action:** Use of AutoLISP while asking for user input to generate the diagram
- **Result:** Reduces the time by 74% for creating the diagram

DATABASE PROJECT

University

Situation: Design and implementation of a database system for a commercial

package holiday booking system (jet2holidays.com)

Task: To develop a database system for an existing online hotel booking site

Action: Collaborate to develop a possible database and develop it individually

Result: Database table with sample data and writing SQL queries to demonstrate the database
